

VALVOLE A SFERA WAFER IN ACCIAIO

WAFFER STEEL BALL VALVES

OMAL[®]
AUTOMATION

LA SEDE STORICA ORIGINAL SITE

Omal S.p.A è un'azienda italiana che opera da oltre 30 anni nel settore dell'automazione industriale. Quando fu fondata, si dedicava esclusivamente alla progettazione e fabbricazione di attuatori pneumatici; in seguito, nel corso degli anni, si prese la decisione di ampliare la gamma dei prodotti con diverse tipologie di valvole industriali. Omal S.p.A ha costantemente avuto come obiettivo principale la soddisfazione del cliente e i suoi prodotti da sempre rispondono ai più severi standard internazionali; sono stati inoltre sempre oggetto di aggiornamenti e miglioramenti, così come i processi produttivi utilizzati. Tutto è stato ottimizzato per offrire all'utente prodotti di fascia alta, affidabili, duraturi e con un eccellente rapporto qualità/prezzo.

L'attività di Omal si svolge attualmente tra due stabilimenti ubicati in provincia di Brescia (nord Italia), la cui superficie totale coperta è di circa 17.000 metri quadrati. Il primo dei due ad essere realizzato ospita la fonderia e tutte le lavorazioni meccaniche mentre l'assemblaggio la logistica e gli uffici sono localizzati nel secondo. Punto di forza di Omal è sempre stato, sin dalla sua fondazione, il continuo investimento in ricerca e sviluppo per realizzare nuovi prodotti. L'impiego di materiali e macchinari innovativi ha fatto di Omal un'azienda leader nel mercato delle valvole e degli attuatori. I risultati raggiunti sono stati resi possibili grazie a uno staff altamente qualificato in ciascuno specifico reparto, dalla progettazione, al controllo della qualità e alle vendite.

LA NUOVA SEDE NEW SITE

OMAL S.p.A. is an Italian company operating in the industrial automation business for over 30 years. When it was set up it started designing and producing pneumatic actuators only, but over the years decided to expand its production to include a wide range of process valves. Omal has always been committed to its customers' satisfaction and its products always meet the strictest international standards. Omal has constantly updated and improved its products as well as its manufacturing processes. Everything has been optimized in order to offer to the user "high end" products that are reliable, durable and at an excellent quality/price rate. Omal's activity is currently being carried in two facilities with a total covered area of 17.000 sqm. The first to be established, located in the North shore of Brescia province (Northern Italy), hosts the foundry and all the mechanical machining while assembly, logistics and offices are located in the new one. Omal's main asset has been, since its foundation, the continuos investiment research and development performed to manufacture new products.

The continuous use of innovative materials and machinery made Omal a leader in the market of valves and actuators. All the achieved results were possible thanks to a highly skilled staff in every specific department, from engineering and manufacturing, to quality control and sales.

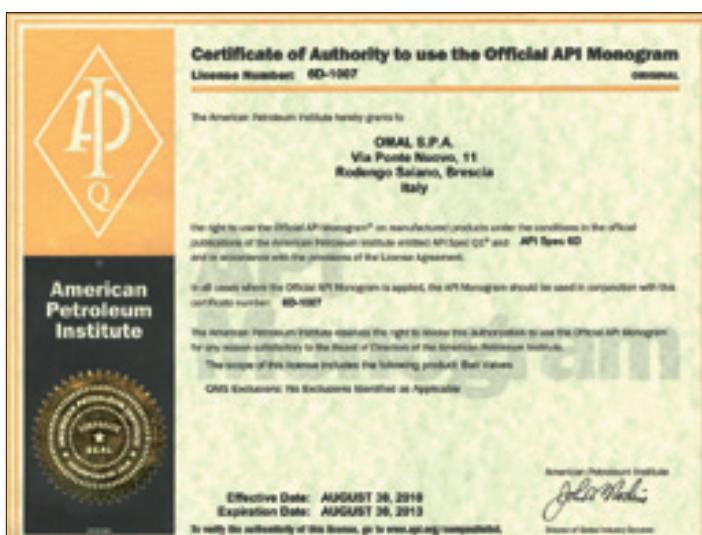

QUALITA' CERTIFICATA *CERTIFIED QUALITY*

Punto forte di Omal è la continua ricerca di prodotti, materiali, macchinari e processi innovativi che le permette di essere sempre all'avanguardia e la rende un'azienda innovatrice e leader nella costruzione e realizzazione dei suoi prodotti. Il personale altamente qualificato in tutti i settori dalla progettazione alla vendita ed i controlli accurati di processo e di prodotto attraverso i macchinari migliori, le hanno permesso di conseguire qualificanti certificazioni di sistema e di prodotto.

As a leader in the market of valves and actuators, Omal is always investigating new products, materials, equipment and processes. In its engineering, design, sales and product/process quality control departments Omal only employs highly qualified staff and uses the most advanced pieces of machinery and equipment. Omal has received most important quality system and product certifications.

CARATTERISTICHE GENERALI GENERAL FEATURES

FORMULE DI CALCOLO PER PORTATA DI LIQUIDI: **FORMULAS FOR THE CALCULATION OF FLUID FLOWS:**

$$Q = Cv \sqrt{\frac{\Delta p}{G}} = (\text{GPM})$$

$$\Delta p = \frac{Q^2 G}{Cv^2} = (\text{PSI})$$

$$Cv = Q \sqrt{\frac{G}{\Delta p}}$$

DOVE:

Q= Portata in galloni USA al minuto (GPM)

Δp= Pressione differenziale

G= Peso specifico del liquido alla temperatura di efflusso

Cv= Coefficiente di portata

WHERE:

Q= Flow in US gallons per minute (GPM)

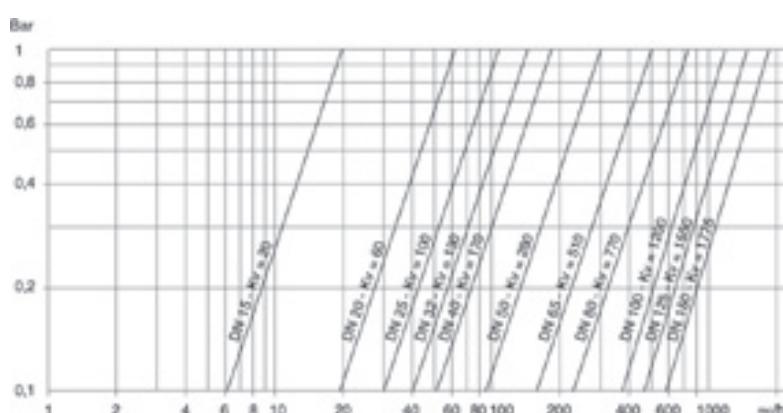

Δp= Differential pressure

G= Fluid specific weight at flow temperature

Cv= Flow coefficient

Cv= Valori medi di portata d'acqua, in galloni USA al minuto (GPM) che passa attraverso la valvola con la perdita di carico (Δp) di 1 PSI, alla temperatura di 60° F.

Cv= Water flow average values in US gallons per minute (GPM) with water flowing through the valve with a pressure loss (Δp) of 1 PSI at 60° F temperature.

DN	CV	KV
15	23	20
20	70	60
25	117	100
32	152	130
40	98	170
50	327	280
65	595	510
80	899	770
100	1401	1200
125	1810	1550
150	2072	1775
200	4419	3785

Kv= Valori medi di portata d'acqua, in m³/h che passa attraverso la valvola con la perdita di carico (Δp) di 1 bar, alla temperatura di 15°C.

Kv= Water flow average values in m³/h with water flowing through the valve with a pressure loss (Δp) of 1 bar at 15°C temperature.

$$Q = Kv \sqrt{\frac{\Delta p}{G}} = (\text{m}^3/\text{h})$$

$$\Delta p = \frac{Q^2 G}{Kv^3} = (\text{bar})$$

$$Kv = Q \sqrt{\frac{G}{\Delta p}}$$

DOVE:

Q= Portata in m³/h

Δp= Pressione differenziale in bar

G= Peso specifico del liquido alla temperatura di efflusso

Kv= Coefficiente di portata

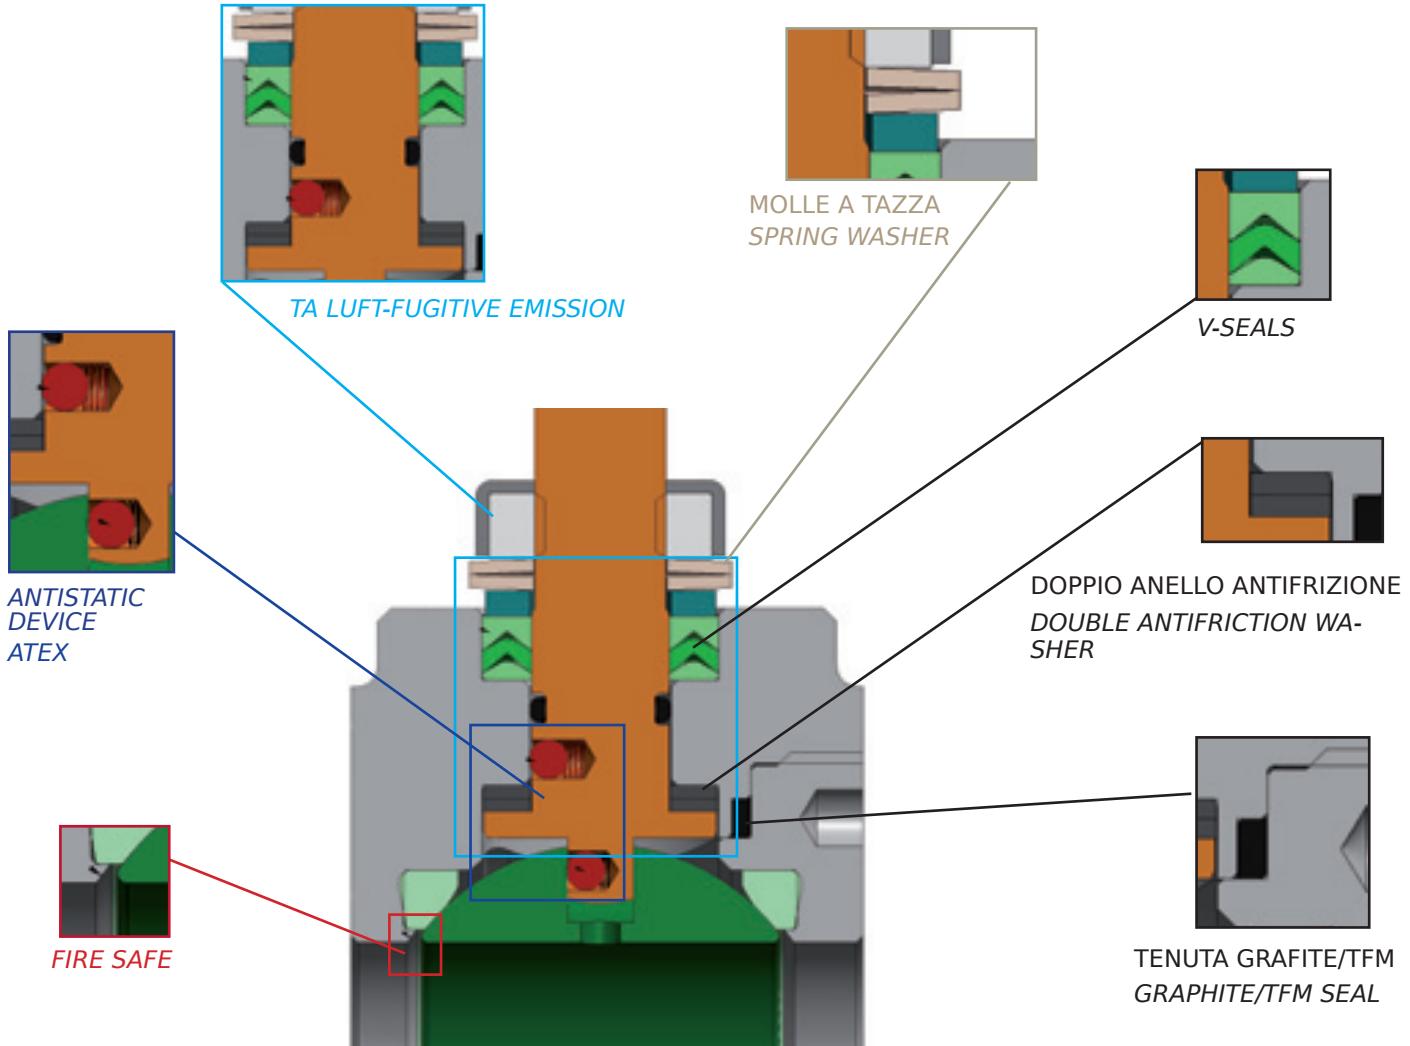

WHERE:

Q= Flow in m³/h

Δp= Differential pressure in bar

G= Fluid specific weight at flow temperature

Cv= Flow coefficient

Progettata secondo ASME/API/EN la valvola a sfera Omal nasce per un utilizzo con attuatore, non solo perchè viene ovviamente dotata di accoppiamento standardizzato per l'attuatore stesso, ma anche dal punto di vista della conformazione delle tenute, che garantiscono un numero di cicli molto elevato. La linea delle valvole a sfera OMAL, nelle sue versioni wafer, split wafer e split body evidenzia quegli accorgimenti che la pongono al di sopra della concorrenza. La costruzione "fire safe" secondo restrittive recenti norme, i dispositivi antistatici e la complessa tenuta dello stelo, corredate dalle relative certificazioni su TA LUFT E FUGITIVE EMISSION, ATEX E FIRE SAFE, sono la premessa per l'ottenimento di prestazioni e di affidabilità a tutta prova.

Designed in compliance with ASME/API/EN, Omal ball valves are meant to operate with actuators. For this reason valves are provided with actuator connections and their sealing elements are specifically engineered for a very high number of cycles. OMAL wafer, split wafer and split body ball valves are designed with all the details which set them above many competitors. The "fire safe" version built in compliance with recent, very strict standards and provided with antistatic devices, a complex stem sealing system and all relevant fugitive emission, ATEX and fire safe certifications guarantees best performance and total reliability.

FIRE SAFE API 6FA - UNI EN ISO 10497.

TA LUFT/FUGITIVE EMISSION Grazie alla particolare doppia tenuta sullo stelo, costituita da un pacco di tenute a V caricato da molle a tazza, la valvola Omal è certificata secondo le severe norme sulle emissioni VDI 2440.

ATEX Le connessioni albero-corpo e albero-sfera sono dotate di dispositivo antistatico che assicura continuità elettrica: la valvola risulta così in accordo con la direttiva 94/9 EC - ATEX.

STELO Montato dall'interno, risulta quindi anti-espulsione. Una doppia rondella antifrizione in PTFE assicura rotazione dell'albero a basso attrito, e alto numero di azionamenti garantendo un'ottima funzionalità alla valvola anche attuata.

FIRE SAFE: API 6 FA – UNI EN ISO 10497

TA LUFT/FUGITIVE EMISSION Thanks to the special stem double sealing system consisting of a V-pack loaded with Omal springs washer. OMAL valves are certified in compliance with very strict emission standards TA LUFT Tal – 194058 – 001

ATEX: The body-stem and ball-stem connections are provided with antistatic devices which guarantee power continuity. The valve is in compliance with Directive 94/9 EC – ATEX

STEM: Being assembled inside, the stem is completely anti blow-out. A double anti-friction washer in PTFE allows the stem to rotate with low friction and the valve to perform flawlessly for a very high number of cycles.

WAFER IN ACCIAIO INOX PN 16-40 - ANSI 150-300 STAINLESS STEEL WAFER PN 16-40 - ANSI 150-300

ESECUZIONE STANDARD

Sfera flottante contenuta, passaggio totale
 Tenuta soft-seat: TFM 1600
 Norme per flange d'attacco EN 1092-1 ed. 2008; ANSI B16.5
 Temperature di utilizzo vedi diagramma pressione temperatura
 Classe di pressione: PN16-40; ANSI 150-300
 Fluido intercettato: aria, acqua, gas, prodotti petroliferi e petrochimici, fluidi aggressivi.
 Antistatic device EN12662-2
 Tenuta stelo: pacco a V di serie in TFM 1600
 Tenuta addizionale su stelo con O-ring FKM
 Stelo anti Blow-out
 Foratura piano per attuatore a norma ISO 5211
 Angolo di chiusura >7°

ESECUZIONI SPECIALI A RICHIESTA

Per altri tipi di flangiature contattare il nostro ufficio commerciale
 Camicia di riscaldamento.
 Guarnizioni di tenuta in: PTFE caricato vetro (RPTFE-GF), PTFE caricato carbografite (RPTFE-CF). Per altri tipi di materiale contattare il nostro ufficio commerciale
 Tenuta integrale avvolgente in PTFE
 Esecuzione monodirezionale con foro di compensazione della pressione nella sfera
 Leva inox
 Dadi e molle stelo inox
 Per esecuzioni speciali con materiali (corpo/sfera/stelo) diversi dallo standard contattare il nostro ufficio commerciale
